

EDUCATION

• Bachelor of Technology in Computer Science and Engineering <i>SRM Institute of Science and Technology</i>	June 2022 – May 2026 CGPA: 8.63/10
---	---------------------------------------

EXPERIENCE

• Accenture <i>Software Engineer</i>	July 2026 – Present
– Collaborated with a development team on real-world web projects, following industry-standard coding and design practices. – Built and tested responsive web pages/components, and assisted with deployment and post-release debugging. – Used Git-based workflows for version control and participated in code reviews to improve code quality. – Documented issues and fixes during maintenance cycles, strengthening problem-solving and debugging skills.	

PROJECTS

- **Video Hosting Platform (Backend)**
Node.js, Express.js, MongoDB, Mongoose, JWT, Bcrypt
 - Built a complete backend for a YouTube-like video hosting platform using Node.js, Express.js, and MongoDB.
 - Implemented user authentication, video upload, like/dislike, comments, replies, subscriptions, and channel management.
 - Designed secure authentication using JWT, bcrypt, access tokens, and refresh tokens.
 - Structured scalable REST APIs with middleware, error handling, and role-based access control.
- **Real-time Chat App (Backend)**
React, Zustand, Socket.IO, Node.js, Express, MongoDB, Cloudinary
 - Built and deployed a real-time chat application with persistent messaging, JWT authentication, and modern UI.
 - Used Socket.IO for real-time messaging, user status, and instant UI updates.
 - Managed global state with Zustand and enabled image sharing through Cloudinary.
 - Developed the backend using Express and MongoDB with REST API and WebSocket event routing.
- **LearnMind – AI-Assisted E-Learning Platform (Backend)**
React, Zustand, Node.js, Express, MongoDB, Socket.IO, Gemini API
 - Developed a full-stack AI-assisted e-learning platform using React, Node.js, Express, MongoDB, Zustand, Socket.IO, and Gemini API.
 - Implemented role-based authentication for students and other platform users.
 - Built an adaptive assessment engine and integrated the Gemini API to generate personalized examinations.
 - Developed student diagnostic dashboards to provide insights into learning and assessment performance.
 - Implemented real-time notifications using Socket.IO and integrated an AI tutoring chatbot for interactive learning support.

TECHNICAL SKILLS

Languages: C++, Python, SQL, PL/SQL, JavaScript, HTML, CSS
Backend Development: Node.js, Express.js, REST API Development, Socket.IO, JWT Authentication
Databases: MongoDB, Mongoose, SQL, Oracle PL/SQL, Oracle APEX
AI / APIs: Gemini API, Groq API, AI Chatbot Integration
AI/ML Concepts: RAG (Retrieval-Augmented Generation), Agentic AI, Embeddings, Vector Databases
Tools: Git, GitHub, Postman, Jupyter Notebook, Cloudinary
Concepts: Data Structures and Algorithms, Object-Oriented Programming, API Testing, Backend Development, Data Analytics, Basic Cloud

ACHIEVEMENTS

• 2nd Runner Up, GENEVOE 2024 – Deepfake Detection using ResNeXt50 and LSTM	2024
• 1st Runner Up, HACKRUSH 1.0 (EdTech Track) – Built a ChatBot for research paper scraping and PDF summarization	2024

CERTIFICATIONS

• Alteryx – Alteryx Designer Core
--
